

## AIR TRANSPORTATION

Winnipeg James Armstrong Richardson International Airport (YWG), operated by Winnipeg Airports Authority Inc. (WAA), is Canada's most centrally located international airport. It is competitively positioned as a 24-hour airport. Only 4 miles (6.5 km) from the city centre, it provides convenient access for Winnipeg business and visitor traffic alike. Winnipeg James Armstrong Richardson International Airport is Canada's longest serving international airport.

YWG offers a broad range of air passenger and cargo services including international carriers, commuter airlines, jet freight carriers, fixed base operators, and various charter operations. It serves more than 3.7 million passengers and handles more than 175,000 metric tonnes of cargo annually.

Winnipeg's leaders have recognized the significance of the airport to the city's future. It is at the heart of a strong provincial transportation sector and the airport is a significant economic catalyst. Winnipeg is one of North America's major air gateways, due to its favourable central location relative to global flight paths.

### **Business Opportunities**

Winnipeg James Armstrong Richardson International Airport is one of Canada's most important airports for overnight all-cargo activity. Winnipeg has major sorting facilities for FedEx and Purolator, receives daily transborder service from UPS and FedEx and is a major hub for Cargojet Airlines and Purolator.

WAA has approximately 800 acres of developable land in four Airport Business Parks (East, South, West and North). Approximately 90 serviced acres with excellent transportation access are available for immediate development.

The Airport Business Park East has a strong existing tenant base of air cargo integrators and aerospace industry leaders. This area has approximately 50 acres available for development. Planned development in this area includes executive office space, hotels, light industrial and retail facilities.

The Airport Business Park South consists of business aviation facilities provided by two fixed base operators (FBOs).

Development in the Airport Business Park West focuses on aircraft maintenance and distribution centres. Future development in the West and North Parks incorporates opportunities such as an intermodal facility, e-commerce distribution centres and foreign trade zone development.

Winnipeg Airports Authority has also entered into a partnership with private landowners adjacent to Winnipeg James Armstrong Richardson International Airport to explore the long term opportunities of 3,000 acres of additional land north and west of the airport.

Winnipeg James Armstrong Richardson International Airport offers flexibility in choice of sites, including greenfield development of sites up to 200 acres.

## AIR TRANSPORTATION

Page 2

CentrePort Canada, located next to Winnipeg James Armstrong Richardson International Airport is the country's first and largest Foreign Trade Zone with direct access to national and international rail, truck and air cargo operations. The 20,000 acre transportation hub offers greenfield investment opportunities for a wide variety of business operations including distribution, warehousing and manufacturing.
